**BRINKER
INTERNATIONAL**

"Melink is familiar with our layouts and provides accurate, unbiased inspections."

—Jeff Smith, VP of Construction for Brinker

Melink works closely with Brinker International. We commission their store HVAC systems all across the United States.

Whenever Chili's, Macaroni Grill, On the Border, or another Brinker restaurant builds a new store or has an HVAC problem with an existing store, we are there to provide competent and dependable customer service.

For example, Melink recently showed Brinker that older stores with short-circuit hoods can be rebalanced like more energy-efficient, exhaust-only hoods.

Brinker also uses Melink as an independent consultant to provide recommendations on how to reduce costs, improve comfort, and eliminate contractor mistakes.
